ONE MILLION cash awarded man whose assets seized by IRS

FOR IMMEDIATE RELEASE

Detroit, Mich.*—A Wayne County man who lost nearly \$50,000 to the IRS over a disputed tax liability says that, remarkably, he's relieved and happy. Relieved because a long, emotionally and financially draining battle is over, and happy because he's net-ted "somewhere around a cool million" in cash from his loss. The money came from an organization whose members are pledged to reimburse him for such losses.

Mr. Mann (legal name withheld*) hardly envisioned such an ending at the time his troubles began two years ago, when the IRS issued him an unlawful tax bill. From the beginning, he says, he tried to show the IRS, then the courts, where the IRS was wrong. But after the agency began levying his pay heavily, he says, they came for his boat and car.

"Like a lot of other people who try to fight with the IRS, my wife and kids were scared, and I wanted to give up ..."

"I was devastated. Like a lot of other people who try to fight with the IRS, my wife and kids were scared, and I wanted to give up on life."

"I didn't know if this educational association I joined a few years ago was going to be able to keep the

IRS off my back. They did do everything they could for me using the legal process." In the end, however, "no matter what the written laws say ... the legal system is stacked against the average citizen and in favor of the IRS, definitely." He doesn't think he's alone in his thinking: "I know a lot of people who kind

of understand that the IRS doesn't obey the laws like they should — they just don't know what to do about it."

Mr. Mann says those people could learn from the "educational association" which helped him stand up to the IRS and understand his rights under the Constitution and the law — the Save-A-Patriot Fellowship.

Over the past six months, as a claimant member of Save-A-Patriot Fellowship, Mr. Mann received about one million in cash from other fellowship members across the country. The money is the result of a program called the "Victory Express," an "insurance-like" program managed from the association's headquarters in Westminster, Md.

As a member's assistance program, the Victory Express compensates members when they have been wrongly charged by the IRS or a state taxing agency. If loss of property or incarceration ensues, other members come to their aid.

(Continued on page 2)

*This "press release" is a fictional depiction only. It shows what could actually occur once the Save-A-Patriot Fellowship reaches its goal of **100,000 members**.

Cash donated to educational radio

(Continued from page 1)

Unlike traditional insurance, which compensates claimants for actual, calculated value, the Fellowship's plan is intended to restore claimant members above and beyond their loss, so as to encourage other citizens not to be fearful in asserting their rights.

"The members came through for me ... far beyond what I imagined," Mr. Mann says. "I'm glad I was able to make a stand on principle, and stood up for my rights, rather than just cave in to government demands."

"We've been around since 1984, and people have now begun to see the value of our First

"The key to our success is that we are a fellowship, and that our members pledge their mutual help to one another..."

Amendment association", says John Kotmair, Save-A-Patriot Fellowship's founder and fiduciary.

"That's why we're continuing to grow, and have become a media and political grass-roots force. The key to our success is that we are a fellowship, and that our members pledge their mutual help to one another, and truly

support each other."

As for Mr. Mann, he plans to put some of his cash to a "good cause." He's returning a large portion of the funds to Save-A-Patriot to support their growing radio network, which seeks to educate Americans about their rights and how to combat the current encroachment of the federal government into all areas of individuals' lives.

***The "press release" above is a fictional depiction only.** It shows what could actually occur once the Save-A-Patriot Fellowship reaches its goal of **100,000 members**. Currently, members who do suffer loss in civil or criminal actions are compensated up to a maximum \$150,000 for loss of property, regardless of the claim size. That award figure will continue to rise as more citizens join the Save-A-Patriot Fellowship!

To enable people to join easily and contribute to this worthy cause, an **Associate Membership** is available for **just \$99 Federal Reserve Notes ("cash")**! To join at the Associate Membership level and climb on board the *Victory Express*, please fill out and mail the membership application within this issue.

Before Save-A-Patriot is able to send out a press release announcing such an award amount, we expect to have 50,000 members and to reach significant media presence in radio.

Our goal is to educate the general public through radio — an effective media tool, not only to grow the Fellowship, but to provide American citizens with the story they aren't currently being told, and begin to reeducate them about their true legal heritage and culture as Americans.

Can you imagine the press coverage Save-A-Patriot Fellowship will gain when such a story is released to media? "Patriot" may well become a household word, and citizens will surely begin to ponder their current tumultuous relationship with the IRS as well as other government agencies!

By John B. Kotmair, Jr.

The United States is the most powerful military entity in the world second to none. It cannot be taken from without, as Abraham Lincoln observed over a century and a half ago. But he correctly predicted that it could fall from within, from an insidious piecemeal attack over a long period of time. I have watched and attempted to fight off this internal attack for the past forty years, and in doing so have gained knowledge and experience in how to best combat it.

Why Fellowship?

An attack on education

This attack was brilliantly begun by taking over the higher institutions of learning, and by influencing elementary education through the establishment of the federal Department of Education in 1979.

The concentration of federal power was started by the Lincoln administration, and the Constitutional loyalists have constantly given ground ever since. Like the American Revolution, the advance of this internal revolution was initiated and financed by wealthy and influential individuals. But unlike the American Revolution, their purpose was not individual freedom, but the establishment of international socialism for their own financial gain and political power.

From the time of the Lincoln administration the institutions of higher education have been turning out one-world socialist “evangelicals” chafing at the bit to change American political institutions established by the Founding Fathers into their utopian one-world dream. They gained positions of influence in every major educational, political, and media organization, and slowly the American dream

turned into the socialist state of which Karl Marx dreamt and wrote. Today, the average American even believes the socialist system he lives in is the “free state” given to us by the Founders.

Payroll taxes and “fair share”

Under the guise of helping the war effort in World War II, Americans were convinced to submit to a payroll tax. Of course, this solved the problem of collecting the social security tax from the individual worker himself, and helped the conspiracy to put the government into debt to the Federal Reserve bankers. Needless to say, once workers got used to the payroll tax, it was continued after the war.

From the beginning of WWII, Americans were bombarded with slogans telling

them that “paying their fair share” was a patriotic duty. Actually, that “fair share” helped tremendously to pillage America by way of the Marshall Plan. Through that plan, Americans were insidiously convinced that as the “world leader” they had the responsibility to support all the world’s nations at their own expense.

Judicial outlaws

As Americans keep evolving into this socialist state, the social security number has become the national identification number, and is now routinely demanded for government and marketplace intercourse. Because Americans believe such demands are based on the law — even though they are not — the federal government is allowed to operate outside of the law with ease. This is exacerbated by law schools teaching students that the opinions of judges are the law, that they ought to cite court opinions instead of the written law in their legal briefs, that judges are the only arbiters of the law,

(Continued on page 4)

“Today, the average American even believes the socialist system he lives in is the ‘free state’ given to us”

(Continued from page 3)

and that juries try only the facts. With the use of this belief in dictum, (mere opinion expressed by judges), the laws passed by Congress and signed by the President have been and continue to be unlawfully replaced by the thoughts, words and political beliefs of judges.

Of course, with the Executive branch and the Senate occupied by federal socialists, the judges being appointed are of the same political persuasion. Thus we have courts protecting government agents who misapply the law and step beyond the scope of their authority, especially in tax cases.

Aiding and abetting wrongdoers

When a citizen tries to civilly adjudicate a wrongfully assessed tax, the courts routinely cover up for government agents by granting the government's motion to dismiss or motion for summary judgment, as the case may be. In this way, they deny the citizen's right to have a jury determination.

Judges routinely prevent defendants in criminal tax trials from introducing relevant evidence; they also routinely instruct the jury wrongfully on the application of the tax laws and the defendant's rights under the law.

Not only do the courts aid and abet wrongdoers in government, they keep defense lawyers in private practice under their thumb by the threat of sanctions, the loss of their license, or by taking away their right to practice in the court. Wherefore, getting any redress from government today is a theory, not a reality.

There is a long train of documented history of this abuse, which those who have been in the constitutional revivalist movement (to force those in government back under the Constitution) for any

length of time are well aware. It is impossible for any one individual to stand against this tyranny, and maintain the Constitutional constriction on government. There is only one logical answer: citizens have to band together in order to stand against such tyranny. Yet the history of the last half-century has proven that third-party efforts, political committees and associations have not been very effective. While they have raised some awareness regarding the problem, they lack the structure to fight off the government onslaught of expansion and control.

The SOLUTION

The only solution, therefore, is for citizens to morally and financially support one another, and to educate others by means of a Fellowship. And as the Fellowship grows, political pressure will eventually force politicians and courts to observe and respect the written law.

Coming to this realization, I created and organized the Save-A-Patriot Fellowship on February 28, 1984, and it has been operating successfully ever since. Its goal can be found on page three, its operation is laid out in the application and program agreement.

If you are concerned about the advancing police state, want to be in charge of your individual existence, and master of your own property, **then we invite you to use the enclosed application and join with other Fellowship members to force our government back under its Constitutional constraints!**

“There is only one logical answer: citizens have to band together in order to stand against such”

Statement of Purpose for the Save-A-Patriot Fellowship

The SAP Fellowship is a 1st amendment association dedicated to seeing that IRS and other government personnel obey the law. Our association recognizes the necessity of taxation (raising of revenues) but we also recognize that this necessity has provisions in the law, and that the government, in meeting its exigencies, may not extend its activities beyond the law.

The Fellowship actively promotes the study of the law and the assertion of one's rights in accordance with the law. It does not "protest" or "object" to any tax, income or otherwise, and is NOT a "tax protest" organization. However, Fellowship members believe that many Internal Revenue Service (IRS) employees routinely misapply and illegally enforce the provisions of the law and that the public must find a way to hold them within the law. To that end the Fellowship educates the public, shows in its publications what the law actually says, and attempts to clarify the limitations of various tax laws as was intended by Congress. The Fellowship does not advocate or condone unlawful resistance, protest, or other like actions.

However, as law abiding citizens we will not tolerate illegal threats, intimidation or acts of violence by government employees who exceed their authority under the law. The Fellowship has researched and developed legal defenses to help prevent this and to protect our Liberty and Property.

The Fellowship believes that this has become necessary because too many government bureaucrats have been relying on unlawful and un-American tactics such as fear and intimidation to keep the public "in line" in order to perpetuate their own private agendas. They have and continue to use the news media to plant stories suggesting that resistance is useless and reprisal is swift and financially painful. These "reminders" and a lifetime of conditioning make it difficult for most people to assert their rights. However, SAP Fellowship members have joined together to help remove the risk by pledging to assist one another!

To our knowledge, there is no insurance company willing to buck the system and insure Patriots against criminal acts of government agencies or their employees. Creating and operating a conven-

tional insurance company would have been impossible. The bureaucrats would have insisted on our submission to the dictates of the Insurance Commission. In no time at all, we would have been expending funds fighting legal actions just trying to survive. It would have also been necessary to protect such funds from the searching eyes of the IRS and other government agencies.

There was only one totally logical answer: a FELLOWSHIP that gives the Patriot insurance-like protection, hence to Save-A-Patriot!

How Does It Work?

Simply put, Fellowship members pledge to reimburse other members for losses of cash or property incurred by illegal confiscations. This is done by spreading the reimbursement costs to all members. For example, suppose that after a valiant and stubborn struggle through the phases of the legal maze, a member were to lose his vehicle to an illegal seizure. Let's value the vehicle at 9,000 Federal Reserve Notes (commonly called "dollars"). If there are 10,000 members participating in the Fellowship, SAP would verify the loss and apportion the liability at a rate of .90 cents per member. PRESTO! Mr. or Ms. Member Patriot suffers NO loss and his friends' fear of possible IRS retaliation is gone! Real-life examples such as this have convinced "closet" Patriots to join the SAP Fellowship in droves! Welcome to the Constitutional Revivalist Movement!

The surest and safest protection of funds is to keep them in the hands of the members. The only money to be sent to SAP Headquarters is the annual 99 FRNs membership participation fee. This is tendered in FRNs (cash) or a totally blank Postal Money Order (cash can be sent by certified mail). SAP maintains no bank account, so checks or money orders made out to "SAP" can't be endorsed and cashed. The membership fee is used for the administrative needs of SAP — staff, rent, phone, printing, postage, etc. After verification by Headquarters of losses to a claimant member, an apportionment is sent out to the member-

ship; you send payments DIRECTLY to the claimant (or their beneficiary)! SAP merely verifies that all members have met their assessment obligations by a simple procedure.

Payment For Incarceration.

There are still occurrences when a Patriot is criminally tried, convicted and jailed. This is the most difficult financial burden to individually shoulder. Therefore, it is the stated policy of the Fellowship to assess for the beneficiary of each incarcerated Patriot 25,000 FRNs per calendar year, during the period of actual incarceration. To the best of our knowledge, there have never been more than 30 Patriots in jail after conviction at any one time. At this rate, and assuming that all were covered SAP Fellowship members, this protection would cost 10,000 members 75 FRNs for all those jailed. If there are 80,000 members participating, it would only be 9.38 FRNs each for all 30 beneficiaries!

The figure of "80,000" is in line with a 1984 federal estimate of the number of participants within the so-called Tax Patriot segment of the Constitutional Revivalist Movement. Using this figure as our goal for total Fellowship participation, we could increase the incarceration payoff amount to 100,000 FRNs each per calendar year and it would only cost each member 37.50 FRNs to support the 30 jailed members! With this kind of hard-cash protection, Americans will not only lose their fear of the IRS, but will almost be standing in line to go to jail!!! Even IRS agents could not resist such an offer!

In other words, remove the financial threat to the average American individual citizen, and the IRS's house of cards will collapse! —

AND LIBERTY WILL ABOUND!!

An Attainable Goal

***How can the voice of liberty be heard across the land?
Talk radio, that's how.***

of information that can truly answer the questions of concerned Americans. The goal of this tactic is obvious: if answers to their questions are not readily available, Americans can be easily led down the path to a despotic world government.

**Save-A-Patriot
is uniquely
poised to grasp
the opportunity
at hand.**

On October 28, 1998, with the support of some Fellowship members, *Liberty Works Radio Network* was born, broadcasting 24 hours a day, seven days a week. The radio effort lasted until June 2001, and came very close to fulfilling the hopes and dreams of patriotic Americans all over this Union of States, patriots who want to see the far left's stranglehold on the news and entertainment media broken.

But the hope of Liberty Works Radio Network is yet alive. If patriotic Americans will support it, it can once more speak and inform Americans of their precious rights, the limitations of the constitution, and the seditious acts of government officials. This information is desperately needed if Americans are ever to understand the danger they are in, and the way to once again enjoy the benefits of liberty.

**An unparalleled
opportunity lies
before us.**

Not having experienced military conflict on American soil in their lifetime, 20th century Americans developed a false sense of security and surrendered their self-reliance to the federal government as the solution to the engineered financial depression of 1929. This reliance on federal government increased during and after World War II, and has become almost total over the past five decades.

It is only now -- with the loss of jobs due to the exportation of American companies, the senseless loss of American lives and money around the world, and the slide of the "dollar" (actually the Federal Reserve Note, a private bank note) against the EURO and other fiat currencies -- that a sizeable number of Americans are starting to ask questions.

And because those questions are ones the Patriot community is positioned to answer, the federal one-world socialists have given the IRS (their Gestapo) marching orders to shut down every source

The IRS tried to shut down the Save-A-Patriot Fellowship in 1993. They raided SAPF offices and the home of John B. Kotmair, Jr., the founder and fiduciary. Nevertheless, they failed to prevail in court. With such a setback, they are unlikely to perform another raid.

Today, the IRS is shutting down Patriot organizations by alleging violations of section 6700 of the Internal Revenue Code, which deals with the operation of illegal tax shelters. Unlike their handling of other Patriot organizations, however, the IRS merely wrote to the fiduciary, asking for a meeting to determine if the Fellowship is in violation of that code section. The meeting was held on July 23, 2003 (audio-tape available from SAPF), and it appears they failed again to prevail in their attack.

Because of the perverted enforcement of section 6700, the Fellowship will likely be one of a very few Patriot organizations surviving this IRS onslaught. That gives the Fellowship the vi-

(Continued on page 7)

(Continued from page 6)

tal responsibility of educating the American public to the dangers they face.

Lessons learned: a brief history of the radio effort.

Realizing that our Liberties cannot be secured without *binding men's mischief with the chains of the Constitution*, and that this "chaining" can only be obtained through educating the American public, Kotmair saw the need to have a presence in mass media. Considering the cost such presence entails, Save-A-Patriot's only feasibly affordable media outlet was talk radio.

So *Liberty Works Radio Network* was born in 1998. After broadcasting from Westminster, Md. for two years and eight months, the network was forced to close at just the time it was poised to expand.

Since *those who do not learn from history are condemned to repeat it*, relating the details of this failure may serve to demonstrate that — in this case — repeating history will not be disastrous, but rather epochal.

BREAKING IN

Although loyal Patriots invested funds for the effort, *Liberty Works* fell short of the target start-up amount by 320,000 FRNs ("dollars"). Still, a man who had been in radio for forty years and had started a previously successful radio network assured *Liberty Works* that the sum raised was enough to get the job done.

Early on, it was apparent that

Veteran broadcaster Andrew "Ace" Earp at the LWRN mike.

a major obstacle lay in obtaining affiliates to carry *Liberty Works* programming. The lack of outlets to sell commercials began to drain the seed money, and talk-show hosts began complaining that no one was listening and responding, which is of course the life-blood of the talk radio format.

To remedy these problems, *Liberty Works* began leasing radio stations with options to buy. This gave the network instant listeners, solving the host problem, but not the problem of commercial sales. Because the only stations the network could afford were those with such low ratings they couldn't be sold, *Liberty Works* was gambling that the programming would become popular enough, fast enough, to sell commercial spots to keep it going.

A STITCH IN TIME

The lease payments drained the seed money even faster, and the network began to look for additional funding. At that time, every wealthy "patriot" the network approached was willing to lend funds if *Liberty Works*

would incorporate and give the "patriot" a controlling interest. If *Liberty Works* had allowed this to happen, its unique voice could have quickly been silenced.

As the money dwindled down to just enough for

one payroll, Kotmair prayed on his way to work that God would send the funds needed "if it be His Will for us to continue with this effort." At two o'clock the afternoon of the same day, he received a call from Gordon Phillips, then the National Representative of the Fellowship. Phillips had a man on the line who wanted to help with the radio effort.

"The man was introduced to me as J. W. Zadar," Kotmair says. "Mr. Zadar asked how much we needed; I replied 'three hundred.' He said, 'that's no problem.' I replied, 'that is three hundred thousand.'"

"To my surprise, he replied, 'that's right.' He asked where the money should be wired, and I gave him the address ... the next day I received word that the money had been transferred and the radio effort was saved."

Zadar eventually donated an additional million FRNs and would have continued to contribute, except that the Securities and Exchange Commission and the IRS raided him and froze all his funds — eighty-five million FRNs.

(Continued on page 8)

(Continued from page 7)

NO CASE, BUT CONVICTION

“Zadar forwarded the government’s affidavit of probable cause in support of the court’s warrant,” Kotmair says. “It was evident that the affidavit didn’t contain any probable cause of a crime being committed, but revealed instead a government fishing expedition. Some months later, when I was called to testify before a federal grand jury in Seattle, I posed to the U.S. Attorney the lack of probable cause and he stated, ‘We have to stop them before anyone gets hurt.’ Unbelievable.

“Until I read the affidavit I was under the impression that the money given for the radio effort was Zadar’s personal funds,” Kotmair says. The affidavit revealed that many individuals were pooling their money, trusting Zadar to invest it for them. Nevertheless, it contained no evidence Zadar was violating their trust with fraudulent acts. The U.S. Attorney, however, convinced a jury that Zadar and others were guilty of some nonexistent “crime,” and they were given long prison terms. (The individuals the U.S. Attorney contended he acted to protect apparently lost all their money when the judge appointed a trustee to care for it.)

BANK DOES NOT PAY

A continued effort to keep the network saw promise in October, 2001, when a banker in Atlanta, Ga., approved the network’s business plan and granted a loan for 1.3 million FRNs, issued as a certified bank check. It seemed the worst was over, because by this

time, the network’s leased stations had gained an audience and *Liberty Works* was ready to sell commercial time.

The loan was to pay off the

balance due so the network would own nine stations outright, leaving 750,000 FRNs for operating capital and a sales force to sell

(Continued on page 9)

AN INVITATION

*from John Baptist Kotmair, Jr., founder
and fiduciary of Save-A-Patriot Fellowship*

Let me share with you the most important thing about the radio effort you are reading about in these pages, the part that makes this message to you so vitally important ...

This network attracted listeners! We had listeners calling in and declaring that our programming was changing the way they viewed political events. The picketing of the station in Reno when we were forced off-air shows the impact the network was beginning to make.

Although it’s distressing that the effort was under-funded and that the network did not receive the loans it was granted, *Liberty Works* obtained, through its efforts, the knowledge of how to grow a radio network.

Now all that is needed is proper start-up funding, and acquiring that funding is not as hard as it appears.

That’s because there are millions of Americans active in one way or another fighting the unwanted, and in many cases, unconstitutional changes ongoing within state and federal governments. Nevertheless, their efforts are fragmented; many work mainly on one problem, such as gun control, pro-life issues, the misapplication of tax laws and so on. Financial resources are wasted on petitions for redress, letters to legislators, court suits and other similar activities.

I have participated in and witnessed the failures of these single-cause activities for 40 years. I have also witnessed many attempts to form coalitions to exercise political influence, but they have all failed, due in part to the individuality of the American Patriot.

But as the old adage goes, *if at first you don’t succeed, try, try again*, and so I offer you another attempt, a “coalition” that’s workable. Because in this “coalition,” you continue to work independently on your particular cause, and promote the enlight-

(Continued on page 9)

commercial time. Everything looked good — until the deposited certified check did not realize any funds to cover checks written on it.

This was puzzling, since a bank's certified check is good when written. Yet the bank in which the check was deposited has never received any payment

from the Grenadian bank of origin. "The check is somewhere in limbo," Kotmair says. "To this day, we have not been able to get a coherent statement about it from anyone."

"Of course, all the radio stations we were leasing went into default and we lost them. When the smoke cleared, the network had one station left. Ever since then, we have been trying to raise the money to put the network back on the air."

LISTENERS DEMAND NETWORK RETURN

But as far as attracting listeners, Kotmair says, "the success of the radio network is without question." When the network went off the air, listeners called and offered financial support. Some even forwarded funds in hopes that it could be revived.

In Reno, Nevada, listeners even picketed the local station in an effort to put *Liberty Works* programming back on the air.

In all, *Liberty Works* demonstrated that if the network were properly funded to the point of commercial viability, it would have been successful beyond expectations, Kotmair says. For example, at the time *Liberty Works* took over the Reno station, it was listed at the bottom of all the competing stations; after broadcasting a little less than two years, it was one of the top stations in town. By the time *Liberty Works* was forced to close, its other stations, acquired later than Reno, were beginning to show the same results.

enment of other just causes at the same time! How? Merely by becoming an associate member of the Save-A-Patriot Fellowship.

That's right. You can put all your efforts into fighting abortion, or gun laws, and fight more effectively by joining the Fellowship. Once the associate membership reaches 20,000 members, we can start the radio network again, and all these issues will be aired effectively 24 hours a day, seven days a week.

Of course, the goal of the Fellowship is to reach at least 100,000 associate members to assure the continuation and expansion of the radio network. The coalition would create a Patriot mass media outlet to compete with the socialist establishment media and educate the American public to the loss of their freedoms and the advance of the one-world slave state.

Isn't that exciting? Well, the good part is, it is also entirely doable — if you will step up to help out!

Due to the fact that the Fellowship has prevailed against the attack of the socialists in government, there is little risk to members who help fund the radio network. Associate members' identities will never be revealed; none of the membership files are kept on Fellowship headquarter premises. When the IRS raided the headquarters and the fiduciary's home in 1993, they were unable to obtain these files, which were kept safe from their prying eyes. In this we thank God for giving us the wisdom to stay one step ahead of the evildoers.

Whether you file tax returns or not, you can join Save-A-Patriot Fellowship and become a proud member of the "un-coalition coalition," greatly increasing your efforts to right these wrongs and preserve for future generations the Liberty for which many Americans have shed their blood in the past, and continue to give their lives today.

Please accept this as your personal invitation to join me in this great and good endeavor. With your help, we can begin anew to take back the media ... to educate Americans on the true meaning of Constitutional government ... and to assure that "God's governmental plan for man" is truly the legacy we

Constitution Obeyed! Liberty Restored!

Government once again limited as the Founders intended.

Imagine the joy and sense of accomplishment we'll feel when these headlines appear in newspapers from sea to shining sea. The jubilation will make the Bicentennial seem like a child's birthday party.

Yes, it will be a glorious day — one we hope to bring about within our lifetime. Still, there is a group of folks who aren't just hoping — they're actively working towards that goal.

Freedom-loving individuals from all over the country have joined together to promote the restoration of the principles of Liberty and limited government, as the Founders of our great country established for us. They understand that there is strength in numbers, and strength in knowledge. Not what passes for knowledge in our public schools and universities today, but knowledge of our history and culture; of our right to Life, Liberty, and the Pursuit of Happiness; and of the insidious ways modern tyrants encroach upon our rights.

YOU CAN JOIN with these patriotic men

and women and be part of the solution rather than part of the problem! There has never been a more critical time to do it than RIGHT NOW!

If you care about the future of your children and grandchildren, and want to help rein in our "Big Brother" government, then the Save-A-Patriot Fellowship is looking for you. We are an unincorporated First Amendment association, dedicated to confining the Internal Revenue Service and other government personnel within the written law.

Please join with us to accomplish this task! THE LARGER WE BECOME, THE GREATER OUR COLLECTIVE VOICE will be, until the sound of it will make would-be tyrants quake in their boots.

We invite you to find out more about the Fellowship, and hope you will see its potential in fighting the usurpation by the government — the servants — of the sovereign powers which rightfully belong to the us, the people — the true masters.

Get started today! **JOIN SAVE-A-PATRIOT FELLOWSHIP** by sending us the application found in this newsletter, or calling us at 410-857-4441.

one of the most highly respected Patriot publications in the country. It is the culmination of over twenty years of blood, sweat and tears of thousands of named and unnamed Americans. The articles appearing on these pages represent the state-of-the-art in legal understanding of the United States system of income taxation. You will not find any groundless "far-out" theories. You will find thoughtful, provocative articles, discussions and opinions that are grounded in fact and logic. The editors strive to ensure the

accuracy of all the presented writings, insisting that the authors give attributions so the reader may verify the accuracy himself. As a matter of principle, we recommend that as each article is read, a copy of the Internal Revenue Code be close at hand. Education is the key to throwing off the (imaginary) chains of IRS bondage!

Remember — an ignorant public is the IRS's best friend — an educated citizen is the IRS's worst nightmare!!

ALL IRS MAIL MUST BE ANSWERED!

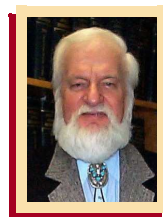

If no response is sent, then under the law of presumption, any allegation contained therein is considered to be correct! *Note: If you have given Power of Attorney, you will want to consult with your caseworker before initiating any correspondence of your own.*

Land of the Free? ... Or Liberty Betrayed?

John Baptist Kotmair, Jr., Patriot, Founder and Fiduciary of the Save-A-Patriot Fellowship, reveals the story behind the dwindling of Liberty in America.

The result of a thirty-nine year search to find the truth behind the vanishing of individual freedoms, **Piercing the Illusion** dispels many misconceptions held by modern-day Americans regarding the extent of federal and state governmental powers, the nature of the monetary system, social security system, federal taxation, and much more.

A must-read for anyone who desires to understand and fight for the legacy of the Founders and the Framers of the Constitution, **Piercing the Illusion** contains 336 pages that simply expose the nakedness of the federal "emperor" of today.

Piercing the Illusion ...

- ◆ that America is still the Land of the Free,
- ◆ that federal law is superior to State law,
- ◆ that courts apply the law as written,
- ◆ that citizens are required to have Social Security numbers,
- ◆ that citizens are subject to an "income" tax on their wages and other domestic income,
- ◆ that federal and state governments can control every phase of Americans' lives,
- ◆ that citizens are bound by court decisions that clearly oppose *natural rights*.

First Class

"If men, through fear, fraud, or mistake, should in terms renounce or give up any natural right, the eternal law of reason and the grand end of society would absolutely vacate such renunciation. The right to freedom being the gift of God, it is not in the power of man to alienate this gift and voluntarily become a slave."

Sam Adams

Samuel Adams was the Father of the American Revolution
